ESAMS Updates
Release Date: 02/25/2012
HGW has released an upgrade to the Mishap Reporting Module. The upgrade provides the user with a number of new features as well as streamlined data entry. All existing Mishap (Injury/Illness, Property Damage and Near Miss) data from 1/1/06 has been migrated into the new Mishap Module to allow for complete five year trending and analysis. The attached PowerPoint will provide more detailed information. Some of the new features are high lighted below:

Effective 1/1/2012, ESAMS is integrating revisions to the NFIRS application per the instruction of the National NFIRS System. These revisions include additional required fields, business rules, and warning messages suggesting quality assurance checks of irregular data. For a detailed list of these changes, click the "Read More" link below.

- SIGN UP FOR ANY TRAINING PROVIDED AT THE AIR STATION

  IE: OSH 10-30 Hour , DTS, EVOC, ATFP,

My Outstanding Requirements	Date Nee
ESAMS Training - Motorcycle Coordinators (3179)	6/4/2011

Available On-Line Courses

1. **2011 Annual Security Refresher Brief (2071)**

Effective security is of a paramount importance to accomplishing the Divisions mission. The Division Security Education Program is based on total management commitment and compliance throughout all levels of this activity. By following Security guidance and adhering to the policies and procedu you will not only be in compliance, you can be assured of staying out of trouble. Security awareness is a vital part of everyones daily activities.

2. **All Hands- Level 1 Anti-Terrorism/Force Protection Awareness Training (CONUS) (1165)**

DOD Annual Antiterrorism refresher briefing.

3. **Annual Fire Warden Refresher Training (2991)**

The Fire Warden Program is designed to provide Commands with an "In-House Representative" capable of identifying Fire Safety Deficiencies on a dai and monthly basis. The Fire Warden provides "On Site" Observations to prevent Fire Safety Hazards from becoming Life and Property Losses. The We Base Annual Fire Warden Refresher Training is taken one year after completing the Fire Warden Classroom Class conducted by the local Fire Preventic Department and is a annual training requirement.

4. **Anthrax Exposure and Awareness (1071)**

This is an awareness session covering the hazards associated with anthrax exposure.

5. **Asbestos Awareness - OSHA Class IV Asbestos Training (14)**

This is an awareness session covering the hazards associated with asbestos exposure.

6. **Assistant-Leading Risk Management Integration (3456)**

This is the third in a series of four risk management modules designed to create the Command's risk management subject matter expert (SME). This c targets individuals responsible for integrating risk management within the command. It provides an overview of risk management policy and vision wi emphasis on mitigation methods and strategies, and discusses tools and resources available to assist in promoting and integrating risk managemen concepts.

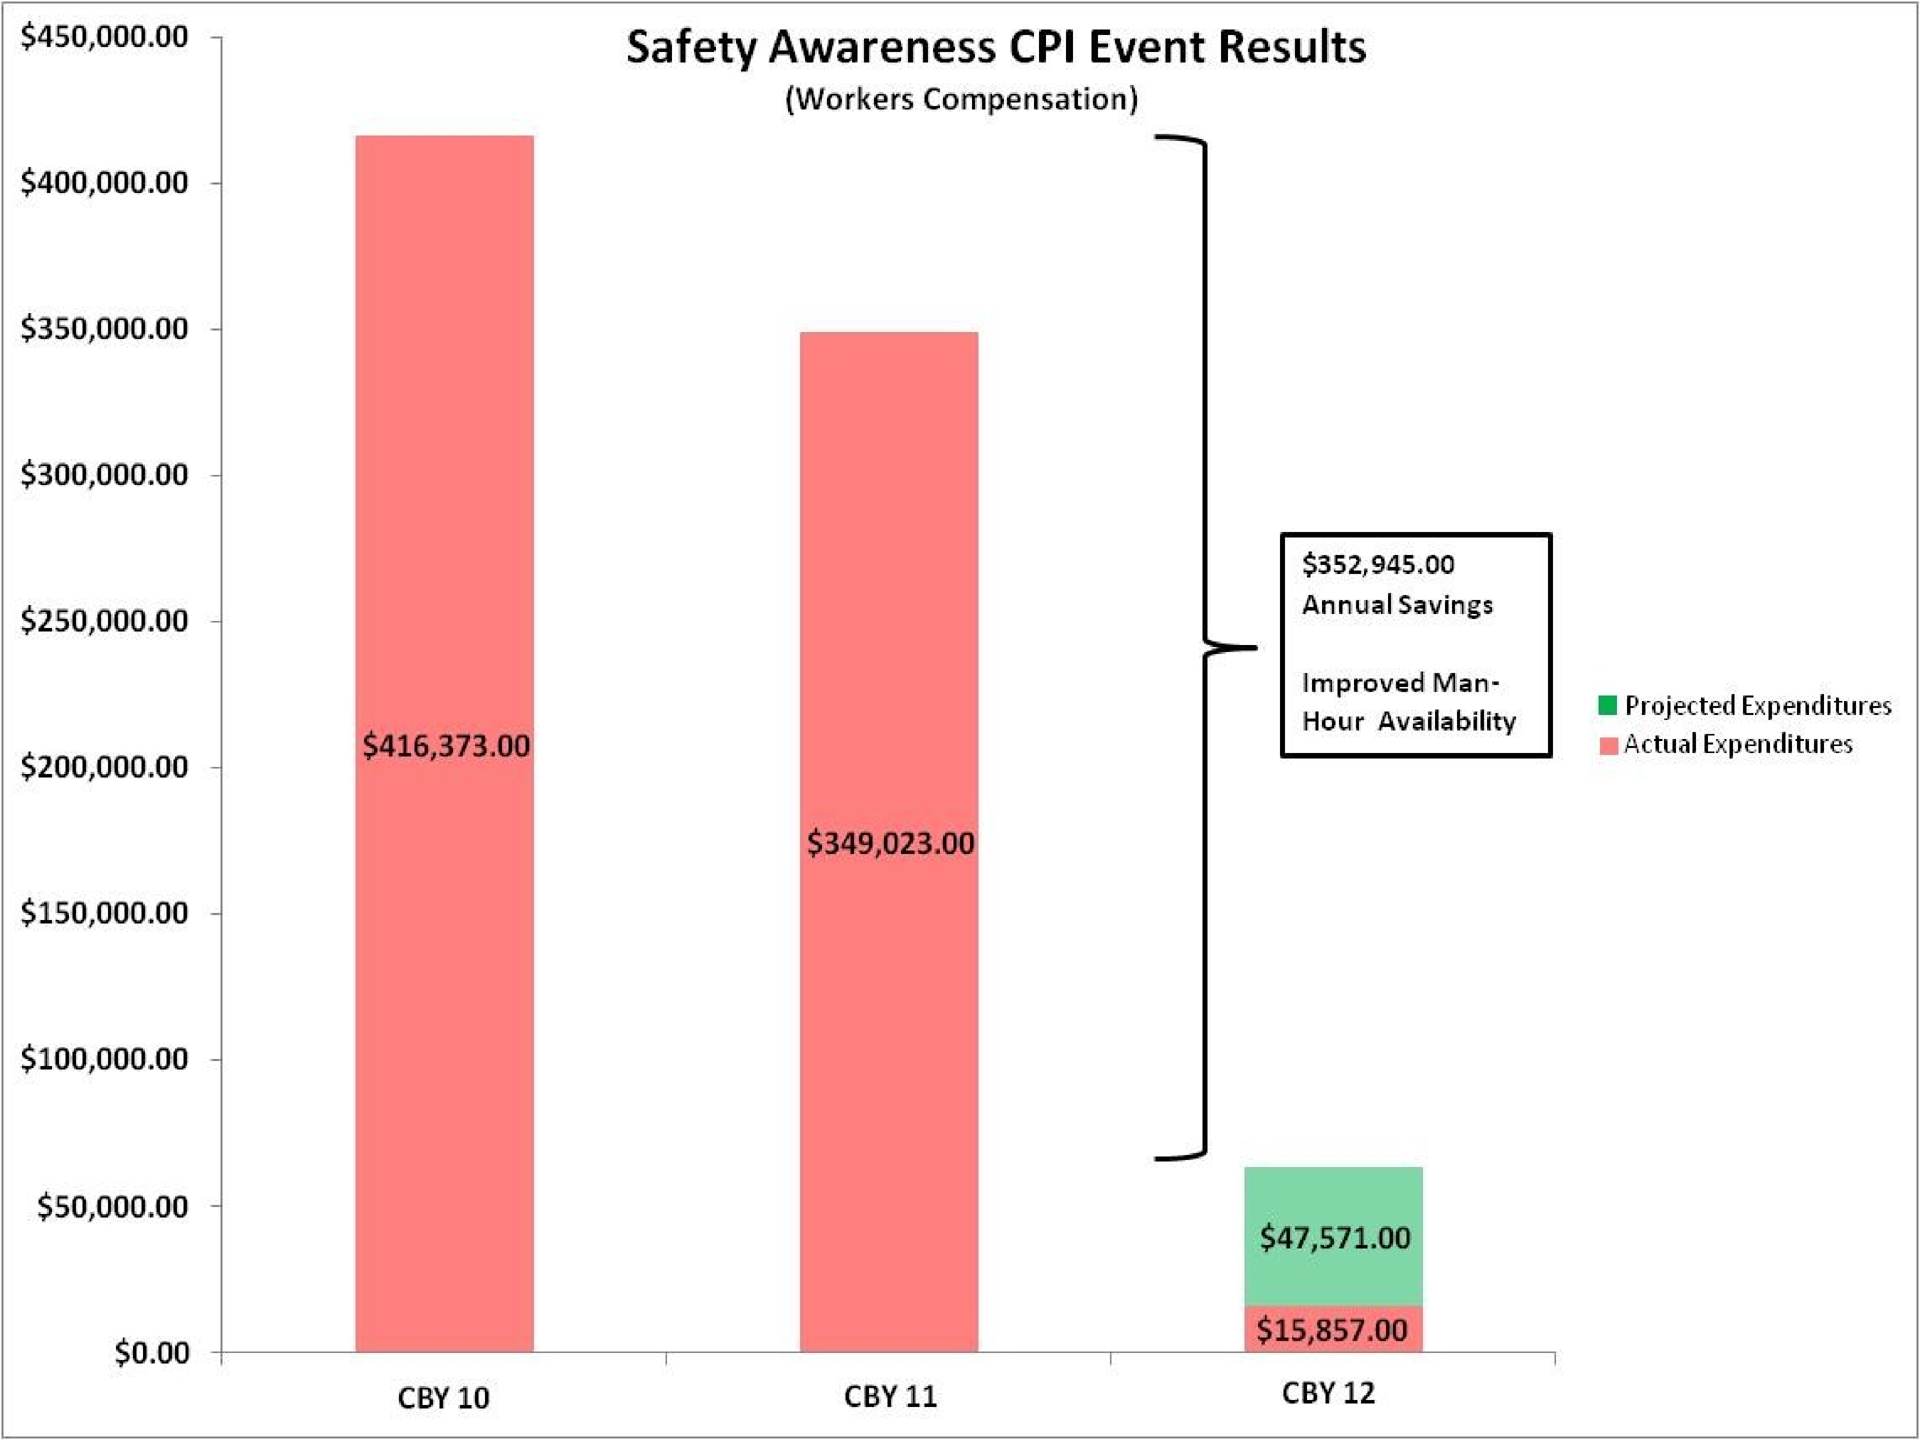

7. **Awareness Training for Architects/Engineers and other Inspectors involved in conducting Inspection, Investigation and Assessment Work on (3639)**

8. **Back Injury Prevention Training (One-Time Only) (40)**

This is an awareness session for personnel with jobs having identified risk factors for back injury. This training includes basic anatomy and physiology

Mission Benefits

BASELINE	BUSINESS IMPACT	BENEFITS
62% accuracy	100% accuracy	Implementation of standardized mishap reporting through use of ESAMS throughout the installation, has improved the accuracy & quality of reports submitted
49% on time	97% on time	Implementation of mishap reporting through ESAMS has improved the timeliness of mishap reporting by 48%
0 reports	17 reports in 2011	Near miss reporting is now being done through ESAMS
0%	66%	1/3 of reports received do not include true root causation factors. Additional training has been incorporated into existing classes to correct the deficiency.
349K	63k	82% decline in workman's comp cost to date (Projection for CBY12 based on 1st QTR results)
12%	78%	66% improvement in established safety boards.
